Dr. P. A. Munz
Pomona, College
Claremont, Calif.

My Dear Dr. Munz:-

While you were in Denver last fall you stated that you would be glad to make further botanical exchanges. I have just returned to Denver after being absent all winter so have been unable to take this up sooner. If you still care for the exchange I will send on such specimens as I have some 400 - 450 numbers within the next three weeks. I would have to send them this month or wait until some indefinite time in the future as I expect to spend the next two years at Iowa State College at Ames, Iowa on some pathological work. You could send the return plants now or in the fall addressed to me at the Colorado State Museum, 14th. & Sherman St., Denver Colorado. The plants of your collecting that I received before were very satisfactory & I am sure that those you collect yourself in Southern California would be both satisfactory and useful.

Very truly yours,
Ira M. Clokey
